

TRIA™ COMPOSITE DOORS

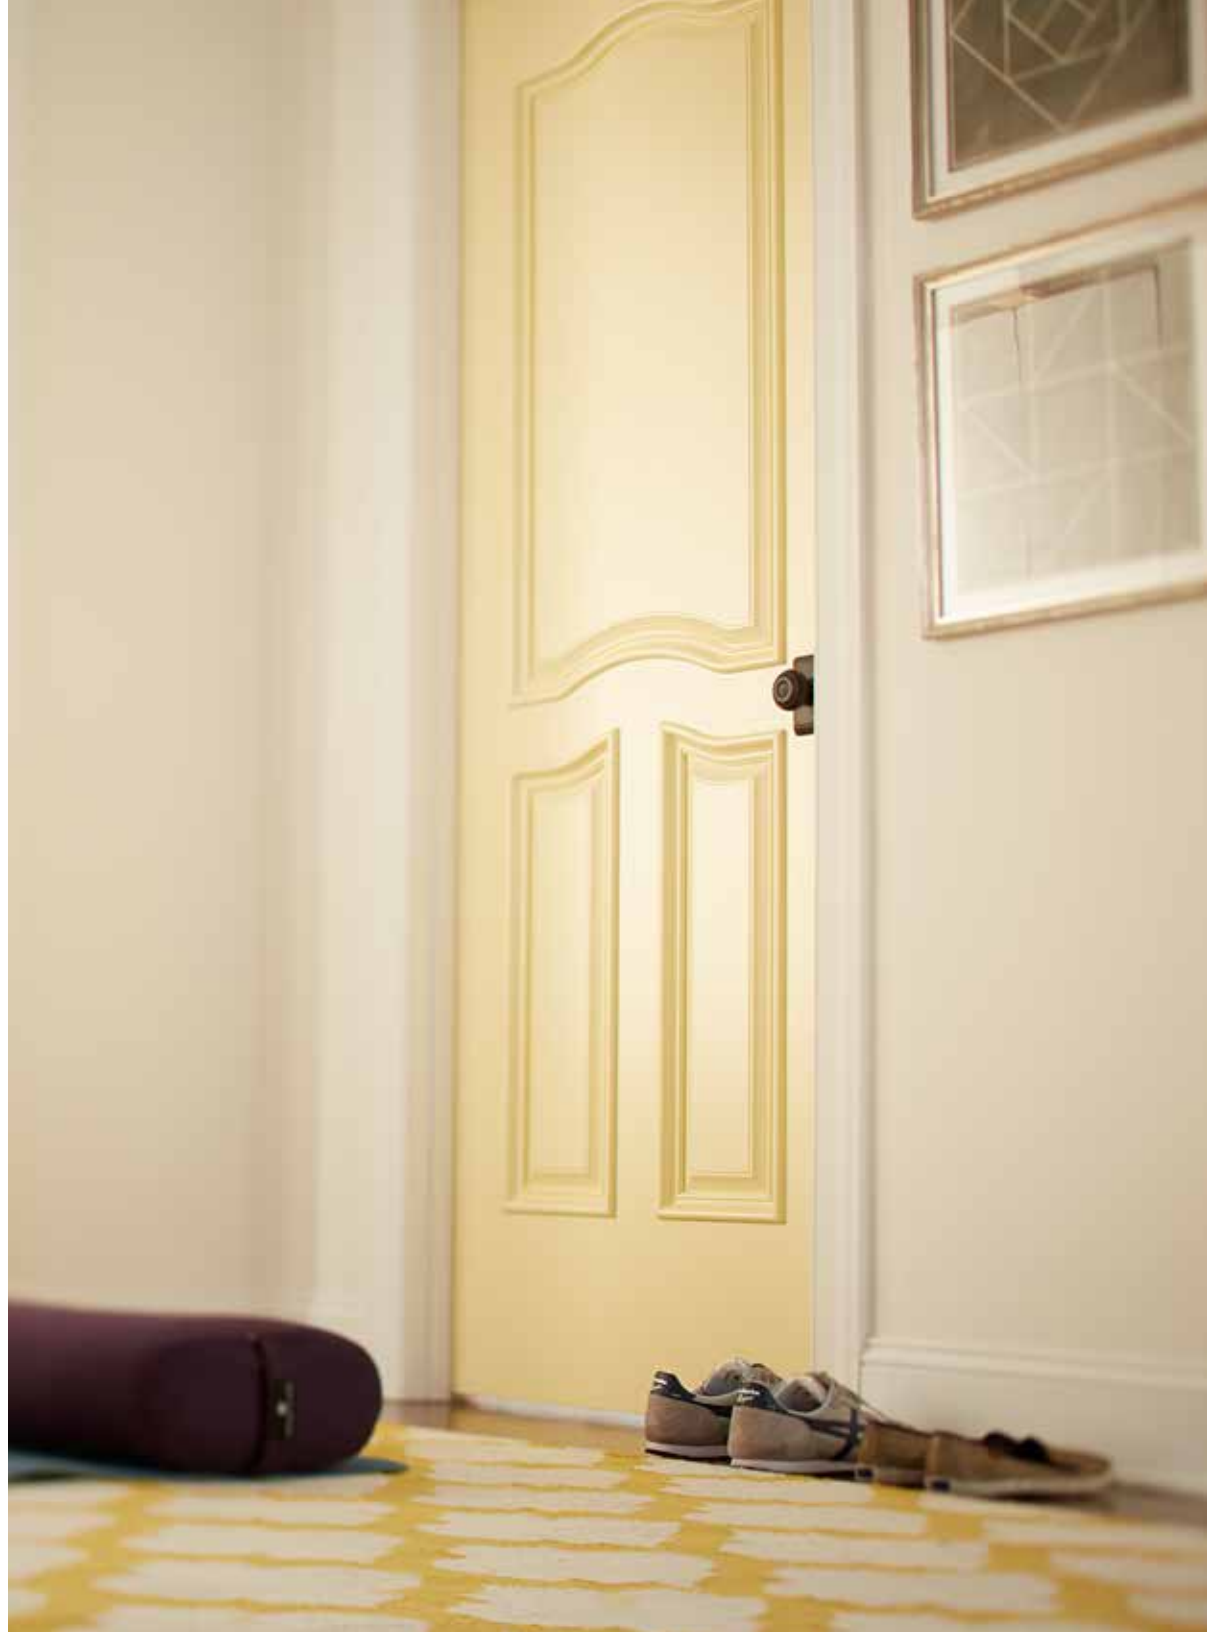

JELD-WEN®
WINDOWS & DOORS

TRIA™ COMPOSITE DOORS BY JELD-WEN

Behind every door is a story: of a family, of an organization, of the moments that define lives. Because no two stories are the same, every Tria Composite Door is made to order: your doors, built your way, to frame your moments.

Tria represents the new black in door design. These doors match any home's décor. With three style choices and dozens of design options, the possibilities abound. And each door is custom-built to your specifications. Your satisfaction guaranteed.

WHY TRIA™?

Each door is individually carved from medium-density fiberboard, which outperforms wood in many areas:

- It stands up to humidity better, which means it will resist bowing, splitting or warping. Solid wood will expand or contract as humidity rises and falls; Tria Composite Doors will not.
- It is harder and more durable. Tria Composite Doors are built to withstand the bumps and dings that inevitably occur. These doors are constructed with the highest-quality standards and patented building techniques, and are backed with a  Ten-year Limited Warranty.*
- The core helps block out unwanted sound, making any room a quiet zone.
- Unlike wood, there is no visible grain on the surface and there are no imperfections that bleed through paint.
- Each Tria Composite Door is built to order with standard lead times to avoid unnecessary delays.

THE TRIA™ COMPOSITE DOOR OPTIONS

WANT CARVED APPEARANCE?

C-SERIES

- Hundreds of patterns
- Seamless, solid surface
- Simulated raised panels
- Two etched profile choices

WANT CLEAN LINES?

L-SERIES

- Crisp, clean lines
- Square profiles
- True shadow lines
- Shaker panel design

WANT ARCHITECTURAL DETAIL?

R-SERIES

- Dramatic contours
- Three moulding options
- Real inlaid pieces
- Precision detailing

DESIGNED BY YOU

Each series in the Tria™ Composite Doors line is, in essence, designed by you. Whether you prefer the carved look that is detailed, sharp profiles for a more contemporary feel, or actual raised mouldings, the result is the benefit of customization without the cost:

- More design options than any other door category
 - Matched pair option (double doors opening)
 - Split design option (different patterns on either side)
 - Arch & Radius top options
 - Wood top rail option
- Precision construction to the most demanding standards - yours
- Industry-leading Ten-year Limited Warranty*
- Delivery with no extended lead times
- Door thickness: 1-3/8" or 1-3/4"
- Standard heights: 6'8", 7'0", & 8'0"
- Standard widths: 2'0", 2'4", 2'6", 2'8", 3'0", 3'6" & 4'0"

EXPLORE
YOUR
OPTIONS

THE C-SERIES

Charisma, Character, & Choice! The C-Series means freedom – to let your imagination run, to find doors that reflect you. Featuring more than 120 design options, each C-Series door begins from solid surface construction that is carved to your taste. The core's sound-deadening ability and easy paint surface add a practical side to your whimsy.

1. CHOOSE YOUR PROFILE

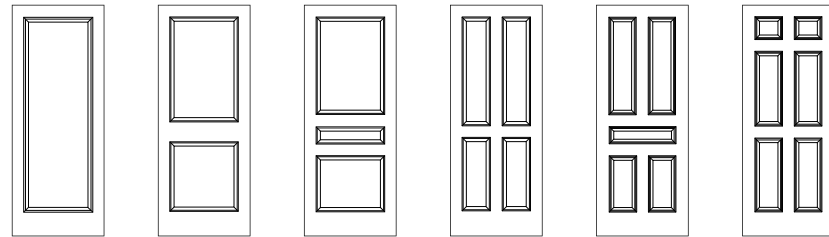

Standard: A wider groove for the traditional look and style

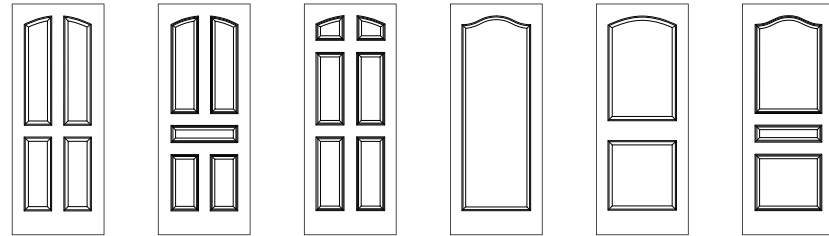

Ogee: A narrower groove for a sleeker & slimmer detail

2. CHOOSE YOUR STYLE CATEGORY*

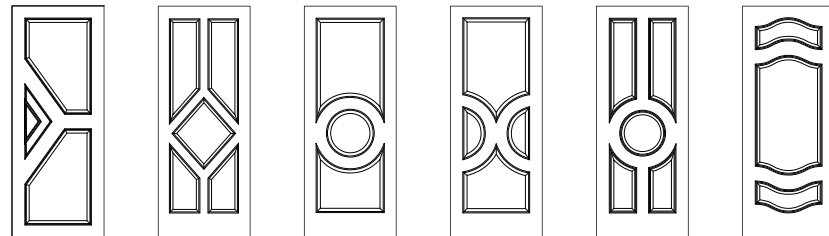

Square - More than 30 standard designs

Arch/Curve - More than 60 standard designs

Intricate - More than 20 standard designs

* Specialty options include Mirrors and Chalk/Dry Erase.

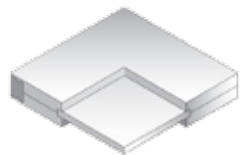

3. SELECT THE DESIGN THAT FITS YOUR HOME AND YOUR PERSONALITY

For a full display of options, visit: <http://jeld-wen.com>

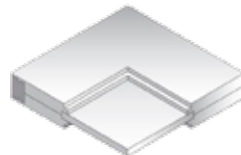

THE L-SERIES

What happens when simple, clean lines are mixed with dramatic, sharp edged design? The L-Series; call it chic, contemporary, retro, and just fascinating. It is state-of-the-art construction with flat panel design. Two solid surfaces encapsulate the interior panel; there is no movement, meaning there will be no gaps, no need to touch up paint, and no loose, wobbly panels.

1. SELECT A PROFILE DETAIL

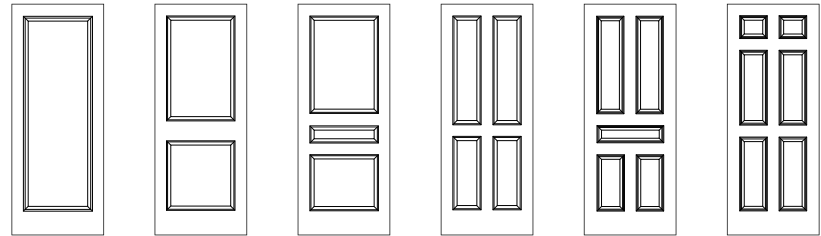

No Sticking: A wider groove for the traditional look and style

Square Sticking: A narrower groove for a sleeker & slimmer detail

2. CHOOSE THE NUMBER OF PANELS YOU WANT

3. PICK FROM MORE THAN 25 DESIGN OPTIONS*

* Specialty options include Glass, Chalk/Dry Erase, Mirror & Louver
For a full display of options, visit: <http://jeld-wen.com>

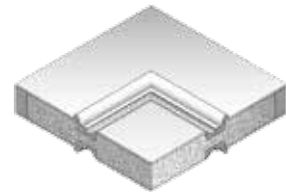

THE R-SERIES

When details matter, the R-Series puts the exclamation point on design. Not only do you select the pattern, that pattern is created by embedding molding into the door itself. This creates a unique and dramatic effect, as the design detail of the R-Series has both above- and below-surface definition for exceptional architectural detail and more than 100 design options.

1. CHOOSE A MOLDING DETAIL

Standard: Standard molding profile

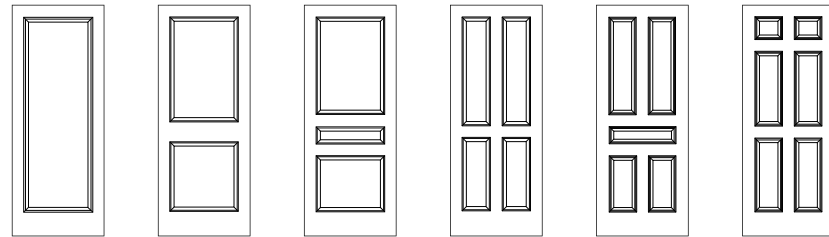

Architectural: A more intricate profile molding

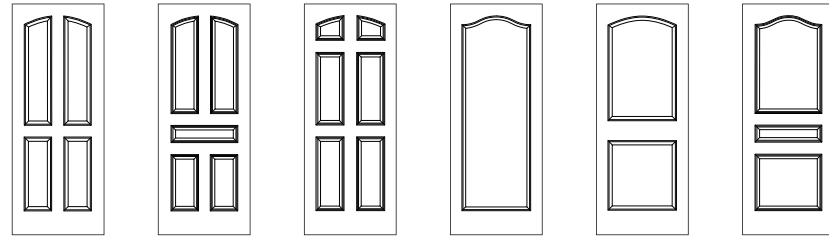

Designer: A more modern profile design

2. CHOOSE YOUR STYLE CATEGORY*

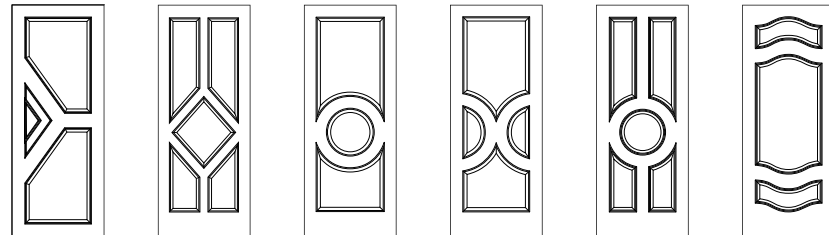

Square Patterns (Over 30 Standard Designs)

Arch/Curve Top Patterns (Over 60 Standard Designs)

Intricate Patterns (Over 20 Standard Designs)

* Specialty options include Mirror, Glass & Louver.

3. PICK THE DESIGN THAT WILL TRANSFORM YOUR HOME

For a full display of options, visit: <http://jeld-wen.com>

WHY JELD-WEN

JELD-WEN has a history as a trend-setter, most notably for the quality of our products. A deeper look reveals what makes Tria™ Composite doors unique.

Sustainable Materials:

The following doors in the Tria collection contain exceptional pre-consumer certified recycled content:

- 1-3/4" and 1-3/8" L-Series Doors, Minimum 78% Pre-consumer Recycled Wood Content (dry weight basis) – Registration # SCS-MC-01856
- 1-3/4" and 1-3/8" C-Series Foam Core Doors, Minimum 74% Pre-consumer Recycled Wood Content (dry weight basis) – Registration # SCS-MC-01855
- 1-3/4" and 1-3/8" R-Series Particleboard Solid Core Doors, Minimum 70% Pre-consumer Recycled Wood Content (dry weight basis) – Registration # SCS-MC-01857

CARB Phase 2 Compliance:

JELD-WEN doors are designed and manufactured to rigorous environmental standards and all relevant doors comply with the CARB (California Air Resources Board) phase 2 standards for formaldehyde emissions. These standards are applicable to all Tria products that contain particleboard or MDF (medium density fiberboard), which will carry CARB phase 2 stamps as signifiers. Additionally, all adhesives used for our Tria collection are No Added Urea Formaldehyde (NAUF).

Safety, Sound & Accessibility:

Like all JELD-WEN products, Tria Composite Doors come with multiple fire ratings: 20-, 45-, 60-, and 90-minute options are available depending on door type and style. They also come with impressive Sound Transmission Class ratings, offering quiet and privacy in areas where those are necessary, and Tria Composite Doors are ADA-compliant.

Forest Stewardship Council (FSC):

The Forest Stewardship Council sets standards for responsible forest management. A voluntary program, FSC harnesses market demand to ensure forests are responsibly managed.

Because FSC is the gold standard in forest certification, it is the only system supported by groups such as World Wildlife Fund, Sierra Club, Greenpeace, Natural Resources Defense Council and National Wildlife Federation.

Tria Composite Doors can be upgraded for FSC certification for Chain-of-Custody of wood products. This certificate covers the manufacture of special order FSC doors using the transfer and percentage systems and covers the sourcing of reclaimed material. Products offered, shipped or sold by JELD-WEN can only be considered covered by the scope of this certificate when the required FSC claim is clearly stated on invoices and shipping documents.

Valid from August 20, 2012 to August 19, 2017

FSC Standards: FSC-STD-40-004 V2-0, FSC-STD-40-003 V1-0, FSC-STD-40-007 V2-0

A list of products that are included in the scope of this certificate may be found at <http://info.fsc.org>.

The following patent numbers apply to products shown here:

•R-Series – 5.918.434 (Inlaid Molding)

•C & L Series - 7.007.435 B2 (Fiberfuse Construction), 7.210.274 B2 (Integra-Lok Stiles)

Great doors start with performance

Great performance starts with attention to detail

Great details start with you in mind
