PRO-SERIES WINDOW STYLES

DOUBLE-HUNG WINDOWS

One of the most popular window styles on the market, double hung windows feature sashes that move in a vertical direction.

features

- Craftsmanship.** Frame and sash corners are miter-cut and fusion-welded for superior structural integrity
- Ventilation.** Deluxe dual ventilation latches enable windows to vent in a partially open position
- Added Security.** Low-profile, cam-action lock
- Easy Cleaning.** Both sashes tilt in easily for safe, fast cleaning from inside the home
- Easy Operation.** Stainless steel constant force balance system for smooth and effortless operation
- Quality Screen.** Extruded aluminum half-screen with Betterview® fiberglass screen wire and exterior screen track for better visibility
- Strength.** Extruded lift and pull handles provide superior strength and durability

Aluminum reinforced interlocking sashes provide maximum seal protection where sashes meet

PPG Intercept® thinplate steel warm edge spacer technology

The sash handle is captured by a dedicated sloped sill with a centered stand leg for added structural integrity

SLIDER WINDOWS

Sliding windows, sometimes called sliders, open and close horizontally and are a perfect solution for areas such as walkways or patios, where projecting windows would be obtrusive.

features

- Easy cleaning.** Both sashes lift in easily for safe, fast cleaning from inside the home.
- Added Security.** Low-profile cam lock.
- Quality Screen.** Extruded aluminum half-screen with Betterview® fiberglass screen wire and exterior screen track for better visibility.
- Pick the Style and Layout.** Pro-Series sliders are available in 2 or 3 panels. The 3 panel is available with equal configurations, and quarter-half-quarter configurations.

PICTURE WINDOWS

Picture windows offer an un-obscured broader view and helps to flood a room full of light and offers to be a great complement to the other windows in this series.

features

- Better Visibility.** Pro-Series picture windows have a low profile frame providing more viewable area and allows the maximum amount of light to fill a room.

HOPPER WINDOWS

Hopper windows hinge at the bottom and open inward. They are typically placed in foundations of the home to provide light and ventilation to darker areas.

features

- Added Security.** Pro-Series hopper windows has a lever-style handle that also has a locking mechanism for added security.
- Quality Screen.** An overlapping full screen comes standard with Betterview® screen wire

Quality from the outside in.

Since 1975, Northeast Building Products has been creating and perfecting window products that not only make your home beautiful but increase its value while providing security, dependability, energy efficiency, and maintenance-free operation.

Our products feature "Quality from the outside in." This winning combination of aesthetic beauty and inner strength means that your windows will maintain their value for years to come. We do this through relentless innovation, state-of-the-art equipment and by using only the highest quality materials and components. As a further commitment to excellence, we back up our offerings with outstanding customer service and a limited lifetime warranty.
